About Us

Binnie proudly celebrated our 50th anniversary in 2019. Since 1969, Binnie has delivered engineering and technology solutions that build and connect communities across the province of British Columbia and Alberta. Our company is employee-owned and managed. Headquartered in Burnaby, BC, we have five offices in B.C. and one in Calgary, AB. We support our clients by providing services including transportation engineering, traffic planning, land development, urban landscape architecture, parks and recreation facilities, project management, hydrology, electrical engineering, construction services, and geomatics services. We are a growing business and our strategic plan includes plans for continuous growth over the next three years.

Indigenous Experience

Binnie has experience on a wide range of projects in and for indigenous communities. Some example projects include:

- Ielərn village: mixed-use residential / commercial master plan development for Musqueam Capital Corporation.
- Sumas First Nation Artificial Turf Field: design and construction of a new artificial turf sports field on Sumas First Nation.
- Statluw District: mixed-use residential / commercial master plan development for Tsleil-Waututh Nation.

Team & Culture

Binnie's goal as an employer is to provide a work environment which provides challenges, opportunities for development, support for career growth, and an overall sense of community and connection amongst our teams. We want our employees to feel that when they leave at the end of each day, they have had the opportunity to use their talents to the best of their abilities. We want our team to feel recognized, seen and supported for what they contribute. As an organization, this is what we continue to focus on sustaining long-term. Corporate Social Responsibility is also extremely important at Binnie. We take pride in supporting our communities, and due to the efforts of our employees over the past year we have helped support CKNW Kids Fund, our local Food Bank, and Movember.ca charities that are near and dear to our employee's hearts. Our employee's commitment to Binnie and their pride in their work is further evidence of Binnie being a top employer in the consulting engineering industry.
